

THE PEVEX HETA STOVE COLLECTION

The distinguished premier designed and built Danish brand

HETA STOVE AND ACCESSORY PRICE LIST JANUARY 2023 - Rev 1

Scanline 900 full glass window

Stoves designed today for tomorrows world meeting smoke control requirements and Ecodesign standards

A World of Stoves, A World of Choice

Pevecxstoves have been long standing partners with Heta, one of the leading European stove manufacturers. Based in Lemvig, Denmark Heta have a renowned reputation for designing and building class leading modern and ultra clean stoves meeting the environmental considerations of today and tomorrow, far exceeding the latest standards of Ecodesign for woodburning stoves.

Throughout our 20+ year partnership, Pevecxstoves has been instrumental in marketing and distributing the Heta brand throughout the UK making it one of the fastest growing and popular stove brands available in the UK today.

With the close cooperation that the Companies enjoy, this has resulted in many projects over the years to develop and build a wide range of stoves designed specifically for our UK marketplace. This has led to the introduction of the ever popular Inspire range of woodburning stoves followed by the class leading Ambition stove range.....a high performance, functional, practical and a stylish addition to any room or fireplace. Further new models were introduced throughout 2022 including the Scanline 900, Vista insets and Green Fire pellets.

Special Note for 2023

We have placed volume orders in advance with the factory that are scheduled to arrive regularly throughout 2023 for Inspire/Ambitions and the more popular contemporary stove models. However, due to the exceptional demand that Heta and the industry has been experiencing, delivery terms for models outside the norm are now being quoted around 52+ weeks from placement of order.

It is recommended that you check with us availability and projected shipping dates for future stove orders.

We look forward to assisting you.

THERMASTONES FOR SCAN-LINE SERIES

OVERVIEW

Dreaming of accumulating heat from a woodburning stove over several hours? With Heta stoves your dreams come true! Depending on your choice of model, there is space for up to six thermastones, which make it possible to store heat while regulating or even shutting off convection air flow. Our thermastones are made of a special cement-based material that absorbs heat extremely effectively and then releases it slowly over a longer period of time - Perfect in combination with fast-heating Heta stoves!
